KAMET SPÓŁKA AKCYJNA carries out the project " *Designing and starting the production of home based parcelBOXes for individual use with special facilities for disabled people*" under the Action POIR.02.03.00 Pro-innovative services for enterprises of Operational Program :Smart Growth" 2014-2020

Contract number: POIR.02.03.05-16-0019 / 21-00

Project value: PLN 329 640.00

Contribution of European Funds: PLN 227,800.00 support intensity 85%

Project objective: The purpose of the project in question is to implement into the Applicant's offer a new design project of ergonomic, home based parcelBOXes for individual use, adapted to the needs of the elderly and disabled people in the range of e.g., motor organs. This will allow diversifying the company's offer and enter the new - product sales markets with its own product, increasing the advantage over the existing competition.

The implementation of a new design project will be preceded by a professional design process consisting of 3 elements: a preliminary audit of the company, confirming the legitimacy of the project, development of a strategy of activities necessary to work out a new design project, and, consequently, the development of a new, prototype product, which is the first intermediate project goal. The indirect goal no. 2 is to obtain a professional advice at the stage of implementation for the production of new home based parcelBOXes .

Planned effects: The effect of the implemented project will be the INDIVIDUAL, HOME BASED PARCELBOX WITH FACILITIES for people with reduced mobility and vision problems.
